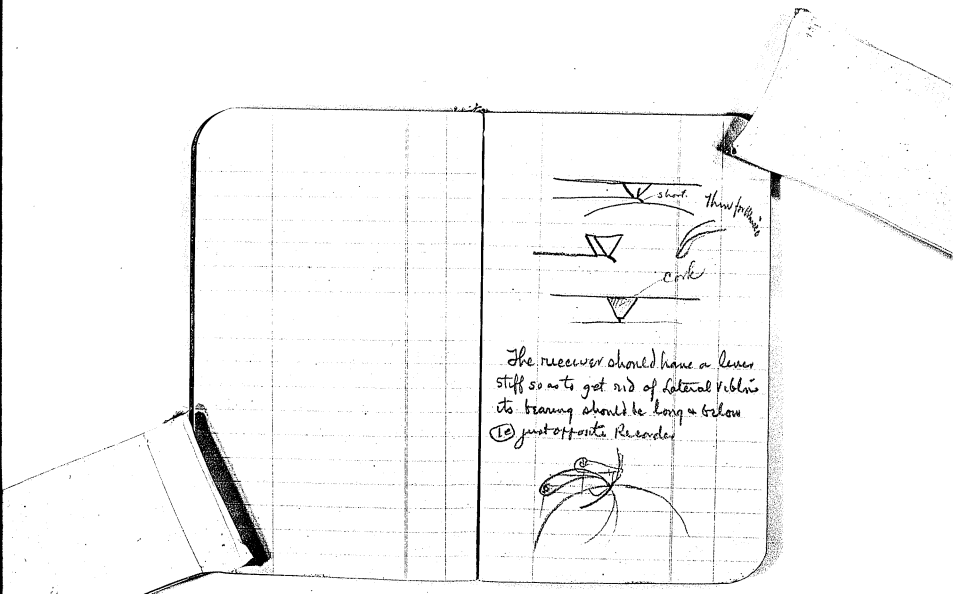
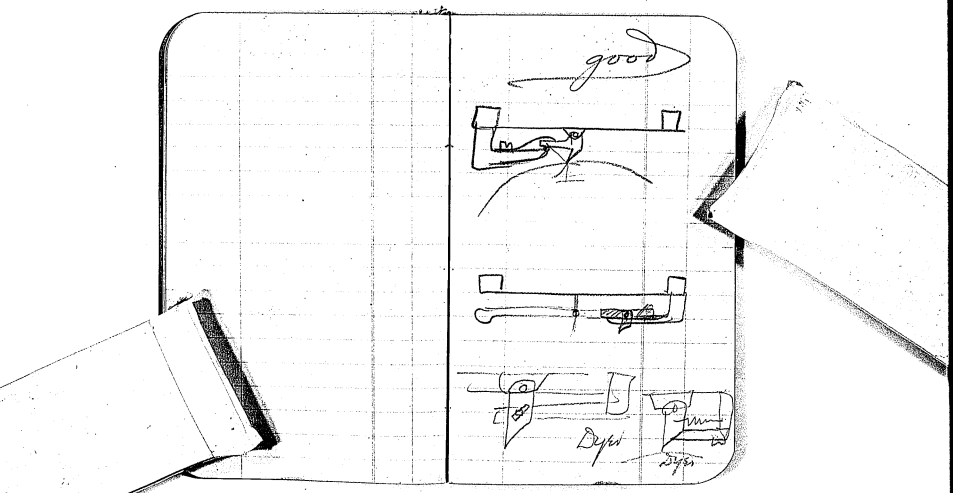
Notebook, PN-Undated.4

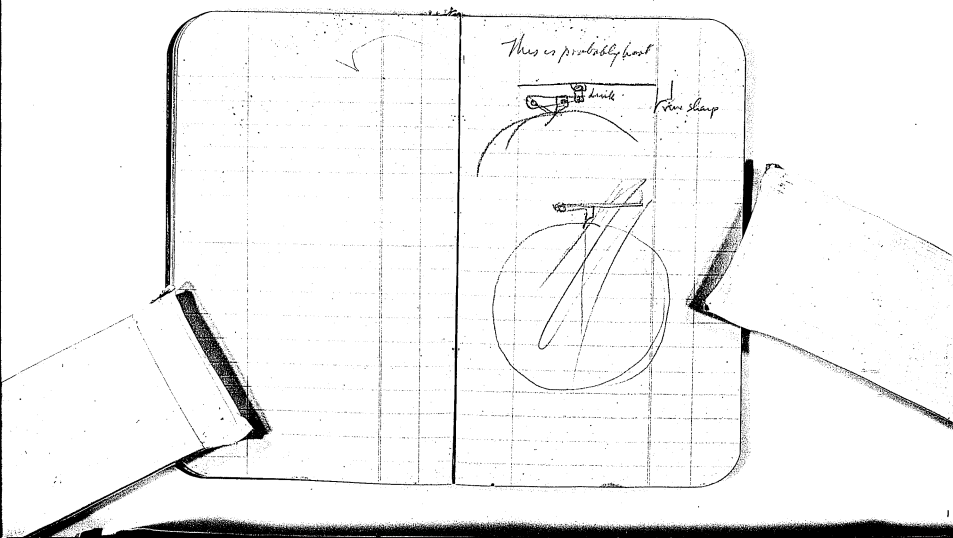
This pocket notebook was used by Edison in the late 1880s or early 1890s for notes and drawings relating to the phonograph. The pages are unnumbered. Only 9 pages have been used.



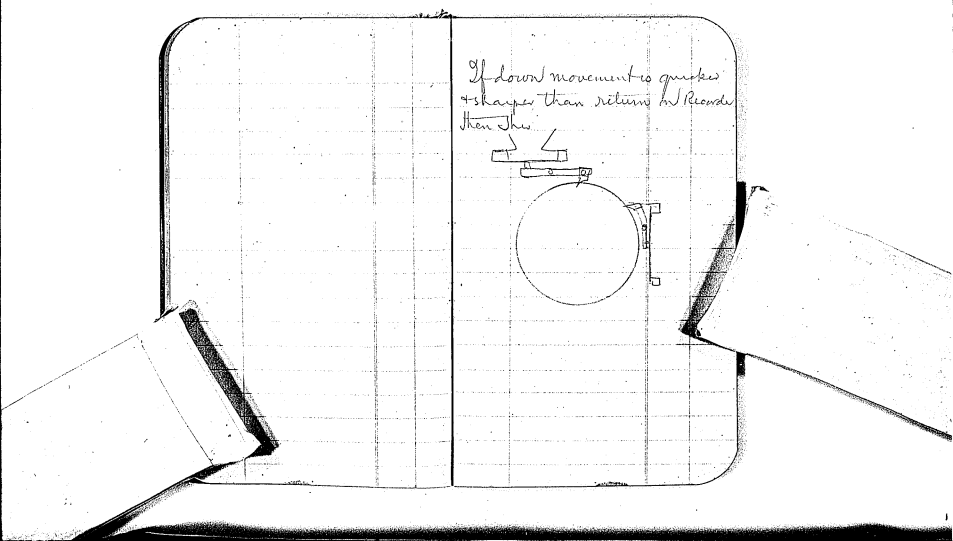
The receiver should have a lever stiff so as to get rid of lateral vibln
its bearing should be long & below
(1e) just opposite Recorder



good
Dyer
Dyer

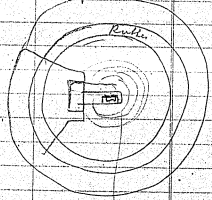


This is probably front
drink
Kiwi slump

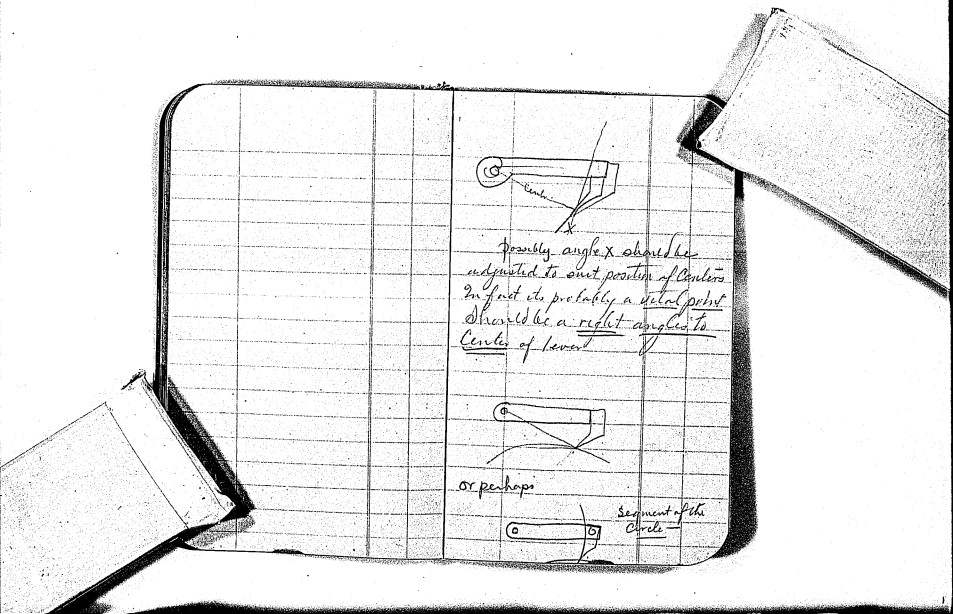


If down movement is quicker
+ sharper than return to Record
then this

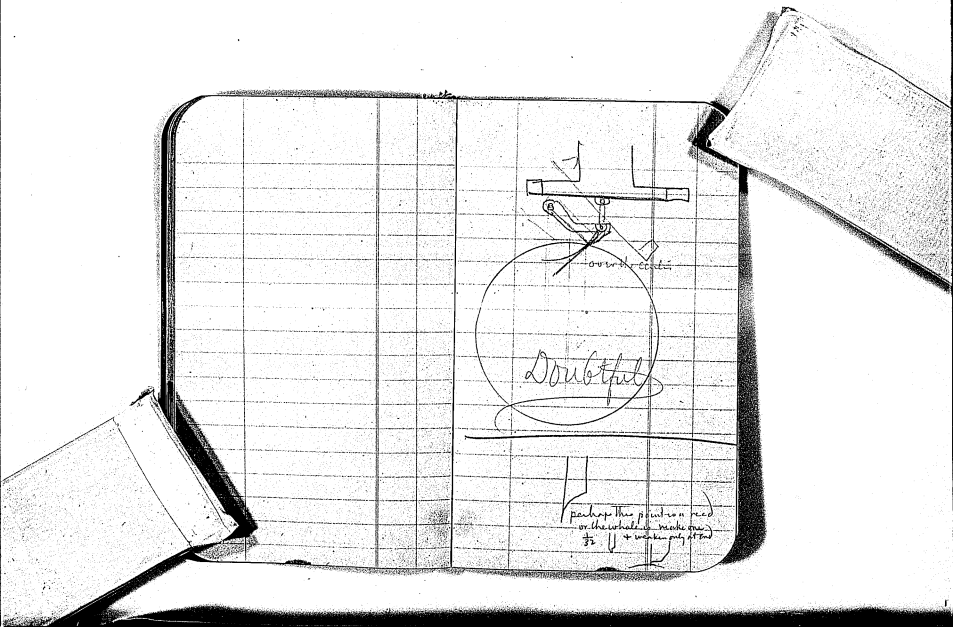
1/8 inch Rubber rings, 1/2 a grain no thick, Shellacked permanently to glass .006 @ .007 glass no thinner, see caliper of third in new drawer



Shellac thick at first + tapers down to nothing within 1/8 inch Edge —



Possibly angle X should be adjusted to suit position of Centers
In fact it probably a Universal Joint should be a right angled to Centre of lever
or perhaps
Segment of the Circle



Doubtful
perhaps the plant-man used or the cubit marks on it
